WORK EXPERIENCE

Marvel Theme — Frontend Developer (*Partnership/Project-based*) — 2017 - 2020

- Collaborated with the designer and built some HTML templates for ThemeForest, such as Appai, Digita, Covira.

PROJECTS

Reboot — Pre-owned computer market

[Live preview](#) | [Client repo](#) | [Server repo](#)

- Reboot is a pre-owned computer market where users can buy and sell their used computer parts.
- Authentication system integration with personalized dashboard design for Admin, Seller and Buyer.
- Buyers can make orders, wishlist any product, view or delete orders from their dashboard. Sellers can add, delete and advertise their products. Admin can view / delete other users, add / view categories.
- **Tech stack:** React, React Router, React Query, Axios, Node JS, Express JS, MongoDB, TailwindCSS, Material Tailwind, Firebase Authentication, Firebase Hosting (client), Vercel (server).

Binary Bua — Online maid service

[Live preview](#) | [Client repo](#) | [Server repo](#)

- Binary Bua is an online maid service provider website built for an individual.
- It has an authentication system integrated with Firebase Authentication. Users can create accounts, log in, log out, and update their profiles.
- Admin can add, delete, and update their own services. Users can add, edit, and delete their own reviews.
- **Tech stack:** React, React Router, Node JS, Express JS, MongoDB, TailwindCSS, Firebase Authentication, Firebase Hosting (client), Vercel (server).

Appai — HTML5 app landing page

[Live preview](#)

- HTML5 app landing template for ThemeForest. I have coded the design that the designer provided.
- 4 homepages, 12 inner pages, total 27 pages. Working contact form with PHP, JS, and Ajax.
- **Tech stack:** HTML, CSS, Bootstrap 4, Javascript, jQuery, PHP, Ajax, Mailchimp, and more.

EDUCATION

European University of Bangladesh

Bachelor in Computer Science
